

Paper Bead Templates

Strip Shapes - Different shapes of strip can create different shaped beads - from basic cylinders / tubes, to ovals, or ridged beads..

Strip Length - The width of the strip across the top will give the length of the bead from hole to hole, the length of the strip will affect the thickness of the bead - longer strip - more wraps - a thicker bead

Solid Edge - starting the strip with a parallel section before you start any taper / shaping will give a solid base to your bead
